

Lifecycle of Butterflies

Eggs

- ❑ Butterflies lay lots of tiny eggs on a leaf.

Caterpillars

- ❑ The eggs hatch into caterpillars.
- ❑ Caterpillars crawl around and eat plants.
- ❑ They grow much bigger.

Chrysalis

- When the caterpillar has eaten enough, it makes a chrysalis. It starts turning into a butterfly inside it.

Butterflies

- ❑ When it is ready, it comes out of the chrysalis as a butterfly and dries its wings.
- ❑ The butterfly likes to fly around and sip nectar from flowers.
- ❑ They can be lots of different colors.

The Butterflies' Life Cycle Starts Again
